A; Molecule type: DNA
A; Residues: 1-119 <CAT>
A; Residues: 1-119 <CAT>
A; Residues: 1-119 <CAT>
A; Rote: this sequence was determined from the germline gene
C; Comment: This chain was isolated from a hybridoma protein that
C; Superfamily: immunoglobulin v region; immunoglobulin homology
C; Keywords: heterotetramer; immunoglobulin
F; 15-98/Domain: immunoglobulin homology <IMM>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  R/Shlomchik, M.; Mascelli, M.; Shan, H.; Radic, M.Z.; Pisetsky, D.; Marshak-Rothstein, J. Ig heavy chain V region precursor - mouse (fragment)
C;Species: Mus musculus (house mouse)
C;Date: 29-Jan-1993 #sequence_revision 29-Jan-1993 #text_change
C;Accession: S09258
R;Hamada, H; Maezawa, K.; Tsurro, T.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              S
              A;Molecule type: DNA
A;Residues: 1-121 <CRT>
A;Residues: 1-121 <CRT>
A;Resperimental source: strain Balb/c
A;Note: this sequence was determined from the germline gene
C;Comment: This chain was isolated from a hybridoma protein that binds influenza
C;Superfamily: immunoglobulin V region; immunoglobulin homology
                                                                                                                                A;Title: Structural and functional implications of a restricted A;Reference number: A91043; MUID:86300658; PMID:2427335 A;Accession: I27887

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

Immunoglobulin V region.

DOMAIN 1 112

NON TER 119 119

SEQUENCE 119 AA; 13169 MM
               (protein WEA) with antibody activity against 3,4-pyruvylated galactose in Klebsiella polysaccharides K30 and K33,";
Proc. Natl. Acad. Sci. U.S. A. 80:4837-4841(1983).
-i- MISCELLANEOUS: THIS CHAIN WAS OBTAINED FROM A MONOCLONAL ANTIBODY AGAINST 3,4-PYRUVYLATED GALACTOSE AND ISOLATED FROM A PATIENT WITH WALDENSTROM'S MACROGLOBULINEMIA.
-i- SIMILARITY: Contains 1 immunoglobulin-like domain.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
